

## Energy Savings through Software

No CapEx · No Hardware · Non Intrusive · Very Easy

## Visualize Data. Get Recommendations. Save

### Get Energy Intelligence

- Automatically pulls data from Utilities -No rekeying
- Easily compare electricity, water & gas by building
- Buildings are tagged as red, orange or green
- Monitor portfolio cost & consumption
- Drill down to building, meter, zone & unit level

### Achieve Savings

- Identify building outliers and fix anomalies
- Manage and reduce consumption & cost
- Get timely alerts & reduce peak demand charges
- Lower supplier charges
- Use best practices to lower cost across portfolio

## About 1Efficiency

1Efficiency's cloud-based software product empowers facility and building property managers to manage and reduce their electricity, water and gas consumption and cost without installing any new hardware, meters or sensors. All data upload is automated and dashboard can be accessed from anywhere with email & mobile alerts.

Whether you have a single building or thousands of buildings, utility expenses can now be reduced and savings of upto 30% can be achieved by subscribing to 1Efficiency's energy savings software product.

1Efficiency, Inc., 233 Needham St., Suite 300, Newton, MA 02464
